

## F50S.411.SD Key tube cylinder with short knob

---

### System-level description

The patented, award winning iLOQ S50 locking system offers advanced security and convenient access sharing capabilities for master-key locking environments.

The iLOQ F50S key safe lock cylinder enables usage of the iLOQ S50 locking system in key safe applications where typically a third-party organization, like fire service or a telecommunication company, needs to have access to the premises/buildings using their own key. The key to the premises is placed in wall mounted key safe tubes, which the organizations can open using their mobile phones as a key.

The lock harvests electricity wirelessly from NFC field, which enables using phone not only as a key but also as a power source thus the lock is completely battery free. As no batteries and no electric wiring are required, the locks are maintenance free and environmentally friendly green solution that eliminates work, costs, waste and harm associated with battery powered or cabled solutions.

The lock doesn't have a keyway due to the contactless NFC operation. It is designed to be used in harsh environments where the locks are exposed to dust, moisture and varying temperature conditions ranging from extremely cold to hot weather.

The phone as a key enables flexible access sharing with time restrictions and audit trail reporting over the air. The security level is kept high and security gaps caused by lost key can be eliminated completely without costly change of locks and keys. The lock fits into 65 mm key safe tubes.

---

### Feature summary

- battery-free programmable electromechanical key tube lock cylinder for iLOQ S50 locking system
- Compatible with 65 mm key safe tubes
- Two different reader knob lengths available
- NFC-powered: no batteries or external power source required for the lock
- Opening with NFC enabled Android/iOS-smartphone or iLOQ K55S Key Fob
- Secured using powerful AES-256 encryption and mutual authentication
- Compatible with European EN15684 standard
- Initial programming with PC and iLOQ P55S.1 admin fob in connection to server
- Access right list for access groups
- Blocklist for individual lost keys
- Internal audit trail record with time stamp (can be configured on/off)
- Supports time restrictions
- Can be configured to require online opening authentication
- Re-programming with keys (Android/iOS phone or K55S Key Fob)
- Firmware updateable
- NFC 13,56 MHz Load modulation (ASK) ISO/IEC 14443A, no transmitter

## Dimensional drawing

## Memory capacity

|                                  |     |
|----------------------------------|-----|
| Number of access rights .....    | 210 |
| Number of blocklisted keys ..... | 500 |
| Number of time slots .....       | 10  |
| Size of event log .....          | 500 |

## Technical data

|                                 |                       |
|---------------------------------|-----------------------|
| Ingress protection rating ..... | IP55                  |
| Lockable without key .....      | <b>X</b>              |
| Reader type .....               | Short key tube reader |
| Surface treatment .....         | Not applicable        |
| Maximum temperature .....       | 80°C                  |
| Minimum temperature .....       | -40°C                 |

## Certificates

|  |         |
|--|---------|
| Attack resistance (EN 15684:2013-01) .....               | Class 0 |
| Category of use (EN 15684:2013-01) .....                 | Class 1 |
| Durability (EN 15684:2013-01) .....                      | Grade 6 |
| Electronic key related security (EN 15684:2013-01) ..... | Class F |
| Environmental resistance (EN 15684:2013-01) .....        | Class 4 |
| Fire/smoke resistance (EN 15684:2013-01) .....           | Class 0 |
| Mechanical key related security (EN 15684:2013-01) ..... | Grade A |
| System management (EN 15684:2013-01) .....               | Grade 3 |
