iLOQ 5 Series+

Smart, secure access
for everyday living and working

iLOQ

Future-proof your property with iLOQ's intelligent retrofit solutions

At iLOQ, we transform existing doors and buildings by upgrading the access. One smart cylinder replaces the old one, enabling modern access management that can evolve over time.

We unlock everyday convenience

With iLOQ 5 Series+, residents and tenants can unlock entrance doors remotely, so there is no need to be there in person to let someone in. Whether it is a visitor at home, a delivery arriving at the entrance, or supplies being dropped off for a small business, access can be managed directly from the app.

Easy key sharing gives end users more control over who can enter and when. Up to 15 people can be given access through the app, making it simple to let in the cleaner, the dog walker, the kids, family members or other trusted visitors.

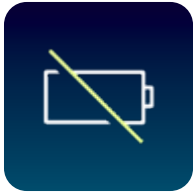

We unlock easier property management

For property and building managers, iLOQ 5 Series+ makes access management simpler, faster and more flexible. Through the improved and simplified user interface, access rights can be granted, updated and removed with ease, helping managers stay in control without unnecessary admin.

The result is a smarter way to manage smaller residential properties and businesses. iLOQ gives managers modern tools to work more efficiently, while giving end users more freedom, flexibility and convenience.

Unbeatable benefits for property owners, security professionals and end users

No batteries, no wires.

iLOQ cylinders require no batteries, electricity, or internet connection, minimizing operating costs while maximizing reliability and sustainability.

Easy retrofit, no maintenance

Our cylinders fit into existing doors. No need for drilling or changes to the infrastructure. Fire and security compliance remains.

Smooth integration

API and SDK developer tools allow integrations that prevent bottlenecks, improve user experiences and reduce costs. Eliminate the need for data duplication and multiple apps.

Secure, cloud-based administration

Access credentials are created, sent, updated and canceled remotely and in real time using iLOQ's secure software platform. Audit trails help prevent or solve misuse.

Optimized user experience

Users can use the iLOQ app on their smartphones to open doors, share access with others, unlock doors remotely, and manage access more easily.

Lowest total cost of ownership

iLOQ's innovative solutions harvest energy from an NFC-enabled smartphone or key fob, eliminating the expense of purchasing batteries and the maintenance time and costs of replacing them. The expenditure involved in handling lost, stolen or unreturned mechanical keys is also removed, making iLOQ the most secure and cost-effective solution in the market.

Minimized lifecycle costs

- Battery-free
- Maintenance-free
- No rekeying
- No travel-related costs for key handling
- Quick and easy administration

Maximized security

- No mechanical keys that can be lost or stolen
- No unauthorized key copying
- Reliable operation even in power outages

Welcome to iLOQ 5 Series+

Smart living and working

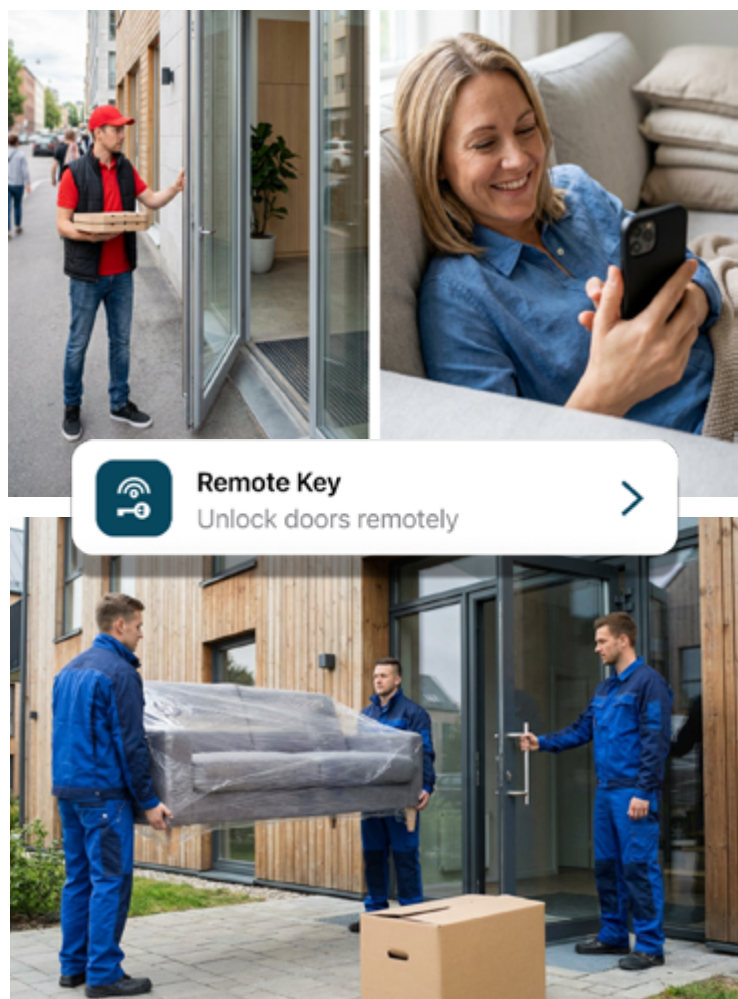

The iLOQ 5 Series+ platform brings intelligent, sustainable access management to every type of property. By combining digital innovation with effortless usability, it empowers residents, small business owners, property managers, and building owners to enjoy safer, smoother, and smarter everyday access, today and long into the future.

Fast and efficient access with no compromise on security

We've become a mobile-first generation. A society where we use our smartphones not just for communicating, but, for example, for entertainment, banking and healthcare. Doesn't it make sense that you can also use your smartphone instead of a key to access your home or business?

With iLOQ 5 Series+, you can access your home, business premises, and shared areas with just a tap on your smartphone. You can share access with your family, friends, colleagues, cleaner, dog walker, or whomever you choose. You can even open the front door for visitors or deliveries from wherever and whenever needed.

iLOQ helps you enjoy key-free access with the confidence that what matters most is safe and protected.

The smartest tools to manage property access and security

Imagine a world where your life becomes easier, safer, and more modern. With iLOQ 5 Series+, you can offer residents and users the independence to manage access to their homes or premises themselves.

Residents and users can use their smartphones to enter their homes or premises and grant access to others as needed, all without any extra work for you. Our advanced programming software ensures you have ultimate control and can provide secure and efficient access management. Less complex day-to-day tasks can be handled with our simple web browser. Our solutions require no rewiring or batteries, making them a quick and clean upgrade for your property.

Simplify your management tasks and enhance your building's value with iLOQ.

Added value for property owners

Smart buildings are the new standard, and residents and businesses expect nothing less than the best. Your tenants and users demand cutting-edge solutions to support modern living and working. With iLOQ 5 Series+, you can offer keyless access to homes and business premises via smartphone. Residents and users can easily access the spaces they need and grant entry to others as needed, all through a simple app, reducing daily key management tasks for administrators.

The best part? Our solutions require no wiring or batteries. They can be installed in new buildings or retrofitted in older properties with no need for drilling or changes to the existing doors or infrastructure, making it a fast upgrade for your property.

Elevate your building's value and minimize your lifecycle costs with iLOQ.

- Get fast and convenient access with your smartphone
- Share phone keys with family, friends, or colleagues
- Open the main door remotely for visitors and deliveries
- Find the main door access code
- Get help and support

Platform overview

Smart, secure and sustainable access at a glance

Best user experience

iLOQ's app offers powerful additional functionality to optimize access and maximize your user experience.

Battery-free and wire-free locks

No batteries, power source or internet connection are needed. Fast installation and no maintenance costs. Reliable operation even in a power outage.

Simple-to-use web browser

No need to download software. iLOQ's web browser simplifies daily tasks and reduces admin time and costs for security administrators and property managers.

Maximum security, minimum admin

Secure and convenient management of locks, access credentials and users on a single cloud-based SaaS platform. Create, share, update and cancel access rights remotely and in real time to ensure only authorized people have the correct access at the correct times.

Streamlined business operations

Developer tools, including APIs and SDKs, enable seamless integrations that eliminate bottlenecks, reduce the need to use several applications simultaneously, enhance the customer experience, and reduce costs.

iLOQ's Portfolio

Keys

Unlock doors with your iLOQ Phone Key or an iLOQ Key Fob. Share virtual keys to let guests or services in.

iLOQ Phone Key
